- Tree Pit Construction

The Aurora Apartments is a new, 18-level, luxury apartment community in North Bethesda, Maryland. The project, developed by LCor with landscape design by Parker Rodriguez, includes an 18 story apartment tower and expansive park area. E-Landscape installed extensive decorative masonry landscape walls around the park, as well as lightweight soil for on-structure plantings located

above the building's parking garage. In addition, our team constructed street tree pits and panels including subdrainage and piping. Our landscape installation work including landscape planting, planters, irrigation, site furnishing and decorative stone work.
