## BRIGHTVIEW GREAT FALLS

### LOCATION

Great Falls, VA

### CLIENT

Harkins Builders

### SERVICES

- Landscape Installation
- Site Furnishings
- Hardscape

For Harkins Builders and the Brightview Great Falls senior living community, E-Landscape provided landscape installation services including landscape plantings, wildlife habitat plantings, and environmental seeding. In addition, our team constructed a synthetic turf putting green, overlook deck and trellis, and Alzheimer's garden, and installed hardscaping (including brick pavers, flagstone steppers, and decorative boulders) and site furnishings (including a fire pit and fountains).

Located at 10200 Colvin Run Road in Great Falls, Virginia, the community is in a residential area adjacent to

open spaces and a National Wildlife Habitat. Brightview communities are known for their consistent landscape branding, with different areas for active interaction, a social courtyard, a meditating courtyard, and a secured courtyard for patients suffering from Alzheimer's disease.

The Shelter Group is the developer for Brightview Great Falls, and Red Sketch Landscape Architecture completed the landscape design work.
