## LEX AT WATERFRONT STATION

### LOCATION

Washington, DC

### CLIENT

Hamel Builders

### SERVICES

- Landscape Installation
- Site Furnishings
- Greenscreens
- Irrigation
- On-Structure Soil
- Concrete Pavers
- Decorative Stone

Located in a prime spot on the new Southwest Waterfront in Washington, DC, the Lex at Waterfront Station is a 12 level, luxury apartment building with 360 degree city and water views. E-Landscape was contracted by Hamel Builders to complete the landscape installation for the project.

Our scope for this project encompassed landscape planting, planters, irrigation, site furnishings, hardscaping (including decorative river rock imported

from Indonesia and concrete pavers), as well as the installation of grills, fountains and an outdoor fireplace. To give the urban setting a more intimate feel, our team also installed architectural greenscreen panels.

Landscape architecture services were provided by Land Design. The project was developed by Urban Atlantic.
